

X12CLA

12" ACTIVE CLUSTER
ARRAY SYSTEM

Xcellence

A true compact array. The X12CLA is a constant curvature array that combines ultra-compact form with astounding levels of performance. Light-weight, safe and easy to setup and carry, it performs far beyond expectations, thanks to a custom high frequency waveguide, advanced acoustic design and integrated 1500 W amplification with DSP.

KEY FEATURES

TRANSDUCER TECHNOLOGY

Two-way active constant curvature array speaker system composed by one 3.5-inch voice coil, neodymium magnet, 12" loudspeaker and one 2.5-inch titanium diaphragm neodymium driver coupled to a 100° x 15° exclusive high performance waveguide.

AMPLIFICATION

1500 W 3rd generation Class D built-in amplifier controlled by a dedicated DSP.

90% efficiency amplifier SMPS (switching mode power supply), allowing maximum power delivery with minimum consumption in an extremely low-weight and reduced size.

Rear connections and control panel with LCD screen to display the different settings, presets and adjustments done by the user.

A capacitive keyboard guarantees the reliability of the system even under humidity and extreme weather conditions.

Exclusive and unique Overvoltage Protection which continuously monitors line voltage and instantly disconnects the system if the line voltage exceeds the maximum permissible level.

DSP & CONTROL

Internal DSP with all necessary signal processing (crossovers, EQs, delay, limiters, gain control, mute) as well as several useful presets to adjust X12CLA to different requirements.

Ethernet connection and full wireless control. The system can be monitored from any spot in the room.

DSPStudio® control software capable of adjusting and setting-up even the finest details and monitoring key parameters of the amplifier: input and output levels, clip limiter activation, amplifier temperature and network connection status.

DESIGN & ACCESSORIES

Several accessories allow easy flying. Inter-cabinet connection is set via lateral rigging bars, providing a 15° fixed angle between boxes.

Ergonomic handles for an easy and comfortable transport.

Baltic birch plywood cabinet with Polyurea® coating, offering maximum reliability and strength for touring as well as for high demanding applications.

"Instant access to outstanding sound"

Once an X12CLA system is flown and in position, optimize the system performance with Amate Audio's DSP Studio® control software.

Parameters such as gain, limiter, polarity, delay and 5 custom parametric EQs can be managed via the software.

Several elements may be controlled at the same time using grouping functions. The software also gives comprehensive information about the amplifier status: input and output levels, heat-sink temperature, clip and protection indications.

DSP Studio® is available for PC and iPad.
