

X15T**HIGH PERFORMANCE
15" 2-WAY ACTIVE
SPEAKER SYSTEM***Xcellence*

The well-known high-end two-way system by Amate Audio, now a step ahead! A new generation amplifier allows a more compact design, but even more powerful and lighter: performance normally found only in larger systems. The 60°x50° constant directivity horn makes it ideal for long coverage and clustering.

KEY FEATURES

TRANSDUCER TECHNOLOGY

Two-way active speaker system composed by one 3.5-inch voice coil, neodymium magnet, 15" loudspeaker and a 2.5" titanium diaphragm neodymium driver coupled to a 60° x 50° dispersion horn.

AMPLIFICATION

1500 W 3rd Generation Class D built-in amplifier, controlled by a dedicated DSP.

90% efficiency amplifier SMPS (switching mode power supply), allowing maximum power delivery with minimum consumption in an extremely low-weight and reduced size.

Rear connections and control panel with LCD screen to display the different settings, presets and adjustments done by the user. A capacitive keyboard guarantees the reliability of the system even under humidity and extreme weather conditions.

Exclusive and unique Overvoltage Protection which continuously monitors line voltage and instantly disconnects the system if the line voltage exceeds the maximum permissible level.

DSP & CONTROL

Internal DSP with all necessary signal processing (crossovers, EQs, delay, limiters, gain control, mute) as well as several useful presets to adjust X15T to different requirements.

Ethernet connection and full wireless control: the system can be monitored from any spot in the room.

DSPStudio® control software capable of adjusting and setting-up even the finest details and monitoring key parameters of the amplifier: input and output levels, clip limiter activation, amplifier temperature and network connection status.

DESIGN & ACCESSORIES

Several accessories allow easy flying. A 35 mm socket for mounting the loudspeaker on a speaker stand is provided at the bottom of the cabinet.

Ergonomic handles for an easy and comfortable transport.

Baltic birch plywood wooden cabinet with Polyurea® coating, offering maximum reliability and strength for touring as well as for high demanding applications.

DSP STUDIO CONTROL SOFTWARE

The application utilises a bespoke control protocol that supports Wi-Fi connectivity (control over IP).

It allows to address the ethernet-enabled amp and DSP modules in the Xcellence series cabinets, affording the user visual feedback on amplifier status and the ability to edit processor values from any spot in the venue.

You can edit parameters such as crossover frequency, gain (per way and separately mutable), limiter, polarity, delay, five custom parametric EQs or an array of filter shapes, can all be adjusted in fine detail, with several elements controllable at the same time using grouping functions.

The app also provides comprehensive information about input and output levels, heat-sink temperature, clip and protection indicators.
